

Moodlerooms December 2014 Updates

On December 29, 2014 Moodlerooms will enhance our LMS platform with new features. Below are some of the improvements that will be implemented.

Assignment Activity:

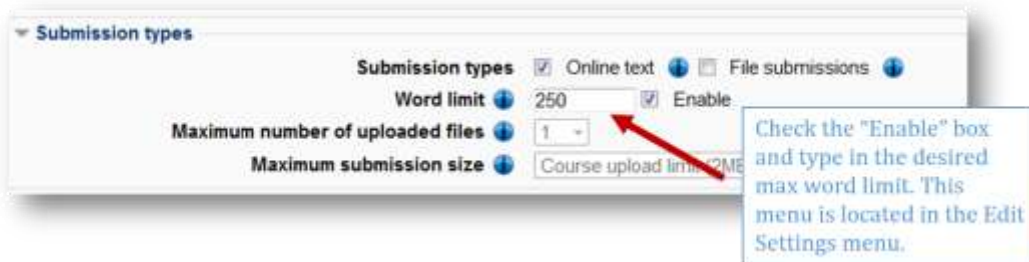

- Instructor comments can be entered directly inline to an online text assignment

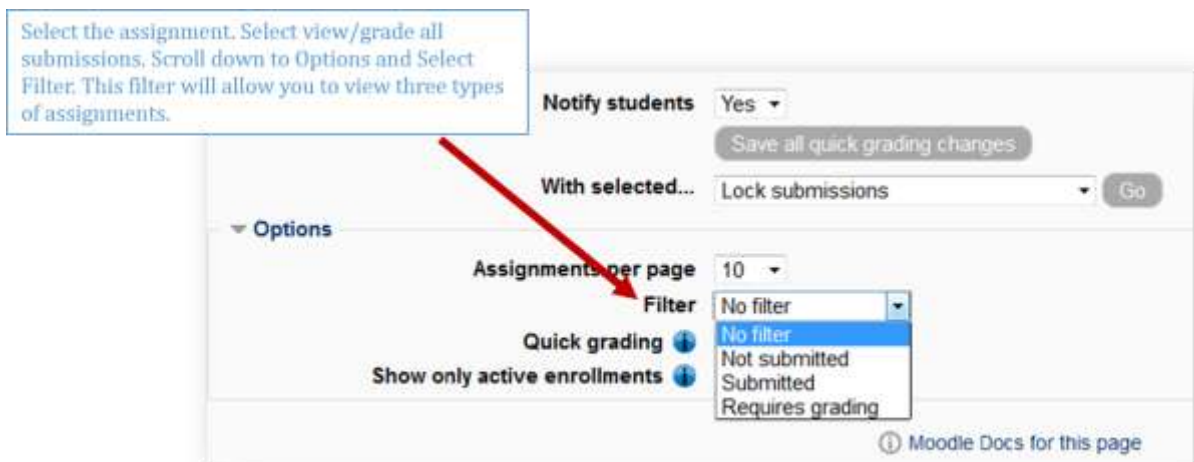

Academic Technology Services

- Maximum word limits can be set for online text assignments.

- When grading assignments a drop-down menu can be accessed from the 'Options' section allowing you to filter submissions so you can; for example quickly see which students have not submitted yet.

Advanced Forums:

- Advance forums now makes it easy for any user to quickly scan a forum discussion and determine who is posting in a discussion, when there are new posts the user needs to read and which forums and discussions are the most active and popular.
