

# Academic Technology Services Moodle

## How do I find my course in Moodle?

### Navigation Block > My Courses

1. In the **Navigation** block, you can click on **My Courses** to open a list of your current courses.

2. Your current courses will be listed first, followed by inactive/archived course links that are greyed out to minimize visibility.

3. After you have selected the **My courses** link, advance by clicking your intended course.
